Suresh Subbarao and Dr. Ratnavalli Subbarao
No. 5, Century Park
Nazarbad
Mysuru 570010

To:

Whomsoever It May Concern:

My name is Suresh Subbarao. I and my wife, Dr. Ratnavalli Subbarao, a Neurologist, have known Dr. K.V. Ravishankar and Dr. Uma Ravishankar for about five years now.

We initially visited Dr. Ravishankar as patients and over the past few years have become aware of the incredible social service that he and his wife have been contributing for the past several decades.

Dr. Ravishankar and Dr. Uma Ravishankar are dedicated Rotarians, and a selfless couple who are providing excellent services towards "Prevention of Blindness" mainly for children with congenital eye defects. They are very passionate about and very committed to prevention of blindness. They have conducted dozens of screening camps free of cost for financially weak families and have performed thousands of corrective surgeries, also free of cost.

Usha Kiran Eye Hospital managed by Dr. K.V. Ravishankar and Dr. Mrs. Uma Ravishankar under the banner of their charitable trust is a very popular credible and prestigious institution in the city of Mysore as an excellent eye care center.

While a large portion of their work is done in and around Mysuru, they have also been very active in conducting free eye camps in several poor countries. They are associated with "SEE" International and have attended nine "SEE" clinics over nine years and have served in Zambia, Gambia, Ghana, Bangladesh, Honduras etc. Dr. Ravishankar's service towards elderly and young patients for the cause of prevention of blindness certainly qualifies him as "Person of Actions and Champion of Impact". His compassionate services have been extended round the globe several times. I and my wife have been very impressed with all the selfless service being provided by Drs. Ravishankar and Uma and have been contributing financially to their trust for the past several years.

In view of Dr. Ravishankar's selfless dedicated and untiring efforts towards prevention of blindness in society by providing free screening camps and free surgeries, we are most happy to recommend him for the "Champion of Impact" Rotary award which, we believe, he richly deserves. His actions single him out as a selfless, dedicated, caring, compassionate and effective Ophthalmologist with a positive and valuable impact both locally and internationally.

We wish him all the best in his profession and Rotary services!

Suresh Subbarao and Dr. Ratnavalli Subbarao
