To whom it may concern,

Dr Uma Ravishankar and Dr Ravishankar are family to me. Watching them during my growing up years setting up their eye hospital was inspiring. Right from the early days, they have been dedicated to the service of the community. I recall their primary care visits to rural villages in Karnataka to provide free eye checks to poorer families, including children and subsequently bring them over to Mysore for a subsidized (price) surgery, including taking care of their stay and travel.

Over the years, not only have they successfully expanded their hospital practice to impact more patients, but also continued their charitable work to support paediatric (and other) populations with their ophthalmic care. They continue to offer everything from optometry to complex surgeries, all for the benefit of those in need. They balance their day to day job as well as this additional charitable work stream with aplomb. They are societal role models.

My well wishes and unconditional support lies with both of them. I cannot recommend them highly enough for the "Champion of Impact" award.

A handwritten signature in black ink, appearing to read 'Chandana'.
