

I was born and brought up in Mysore and qualified as a doctor. I came to Wales in 1956 and settled down in Merthyr Tydfil where I worked as a family practitioner. I joined the Rotary Club of Merthyr Tydfil in 1974 and have served as its President and as District Governor of RI Dist 1150

I came to know about the great work that Dr Ravishankar and his wife Uma are doing through their charitable trust about 20 years ago. I have followed their philanthropic work since then and have been in contact with him ever since.

Through his work in Mysore and on his many missions to countries in Africa he has restored the sight of countless children by cataract removal and squint correction.

I have the utmost respect for Dr Ravishankar and admire his dedication, hard work and continued efforts to help children have good eyesight

He deserves our accolades and have no hesitation in recommending his name for recognition as a “ Champion of Impact”
