TO WHOMSOEVER IT MAY CONCERN

It is with great pleasure that we extend our heartfelt testimonial for Rtn. Dr. K. V. Ravishankar and Dr. Uma Ravishankar on behalf of SFPI, The Shibulal Family Philanthropic Initiatives. We have had the privilege to support the Usha Kiran hospital's remarkable work, focusing primarily on children's eye health for more than a decade.

Dr. Ravishankar and Dr. Uma Ravishankar have emerged as champions in their unwavering commitment to addressing eye conditions in children, including squint, congenital cataract, droopy eyes, and tear sac blocks. Their dedication has been instrumental in organizing major Eye Screening and General Medical Check-up camps, creating a profound impact on the lives of thousands of young patients in Mysore.

One of the most commendable aspects of their work is their relentless commitment to providing free eye surgeries, medicines, and spectacles to children in need. It is within the eyes of these young souls that we witness hope rekindled, as squints are corrected, congenital cataracts are treated, droopy eyes regain vitality, and tear sac blocks are cleared. The transformations that we have seen in these children are a testament to the power of focused care and expertise.

Through our collaboration with Dr. Ravishankar and Dr. Uma Ravishankar, our initiative of SFPI, Ayur Raksha, has been able to make a lasting change in the lives of young patients suffering from various eye ailments. It is indeed a privilege to witness the profound impact that their dedication and expertise, combined with our support, have had on these children.

In conclusion, our partnership with these exceptional doctors exemplifies the tremendous impact that compassion and collaboration can have in transforming the lives of young patients in need of life-changing eye surgeries. The doctor couple are making a powerful change in the lives of these children.

Warm regards,
